DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6, 8-27,29-43 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art of record does not disclose, in single or in combination, QoS station containing a point coordinator in wireless LAN network with point coordinator having a QoS management entity receiving end-to-end QoS message characterizing user application including a QoS parameter set that is expressed at layer 3 and higher of an ISO/IEC basic reference model of OSI ISO/IEC 7498-1 and is to be passed down to layer 2 of point coordinator for enabling QoS traffic transport of application and admission control entity responsive to QoS message requesting for admission to application to wireless network. ACE rejects or admits the request based on an outcome admission control decision and QME establishes at least one virtual stream in layer 2 of basic service set for transporting traffic of application between logical link control sublayer entities within the basic service set.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
